

PCN Overview

PCN Issue Date:	6/2/26
PCN Type:	Design Change
Product Name:	PA-ST5
Part Number(s):	Only PA-ST5 Model
Batches Affected:	2504 and After

Description of Change

The PA-ST5 linear actuator has been updated to use a Molex SL connector system, replacing the previously specified Molex Mini-Fit Jr. connector. This change affects the mating connector required to interface with the PA-ST5 in your application.

Customer Impact of Change & Recommended Action

Units ordered on or after March 10, 2026 will include the new Molex SL connector. If you are integrating the PA-ST5 into an existing system, please verify which connector version you have before wiring or ordering mating connectors. If you require a specific connector type for backward compatibility, contact your sales representative before placing your next order.

New mating connector P/N: 701070001

New mating terminal P/N: 16020107

Reason for Change

This change standardizes the PA-ST5 connector interface to match Progressive Automations' micro actuator product family, enabling direct compatibility with the CB2 control box without additional adapters or wiring modifications.

Validation and Qualification

Testing and Validation Conducted:	S. Chui	Yes
Engineering Approval:	Z. Gonzalez	Yes
Summary:		

Engineering validation and testing were completed, and all relevant marketing and product documentation has been updated to reflect the new specification.
