Step 6: Adjust CPU Holder and Install PC

Step 6A: Loosen the base by turning the knob located on the bottom. Unlock the levers found on both sides of the holder.

Step 6B: Place the PC on the holder and raise the base until it touches the top of the holder. While holding the base so the PC is touching the top, lock the levers on both sides.

Step 6C: Slide the base so that the side panel presses against the PC. Turn the knob on the bottom to lock the base in place.

Note: Unlock and lock the levers found on each side of the holder when adjusting the height.
