DS-03

User Manual

Tools You Will Need

Phillips Head Screwdriver

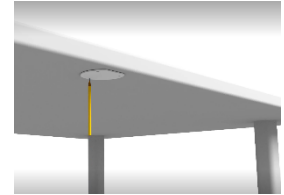

Power Drill

Pencil

STEP 1

Position the included paper stencil under your tabletop and use a pencil to mark the 3 screw holes for installation. After marking the 3 screw holes, this paper stencil can be kept for future use or thrown away after.

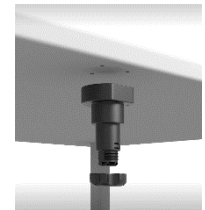

STEP 2

Use an Electric Drill to make three 0.6" (15mm) deep pilot holes for the included wood screws that will be used later. To avoid tabletop damage, do not drill further than the required depth.

STEP 3A

Unscrew the Knob from the Swivel Mount and place the knob safely aside for now.

STEP 3B

Secure the Swivel Mount underneath your tabletop by installing the 3 wood screws using a screwdriver.

Step 4

Insert the drawer together with the Swivel Mount and then screw the Knob into place to finish the installation.

Operation

Swivel the drawer open and place your office supplies into the drawer for storage. To free up extra space, you can swivel the drawer close to tuck away your office supplies under your tabletop.
