OPERATING NOTES

INITIAL SETUP

1. Plug in the receiver to the FLT control box.
2. To pair the remote, press and hold the pinhole button on the receiver, then press both the up button (+) and down button (-) on the remote. The red light on the remote will turn on and an audible beep will come from the control box, confirming that the devices are paired.

SETTING MEMORY POSITIONS

1. Move the actuator(s) to the desired position using the up button (+) and down button (-).
 2. Press the memory button (M), then the button you want to save the position to (1 or 2)
 3. Press the saved memory button to move the actuator(s) to the saved height.
- Note:** Pressing any button during movement will stop the actuator(s).

REMOTE BUTTONS

Remote Button	Control
+	Press and hold to extend actuator(s).
-	Press and hold to retract actuator(s).
1	Memory Position 1 – Press once to move to saved position 1.
2	Memory Position 2 – Press once to move to saved position 2.
M	Memory Button – Used for setting memory positions.

RESET PROCEDURE

See the FLT control box user manual for instructions.
