Dimensions

Operating Notes

Connect the receiver to the FLT control box. To pair the remote, press and hold the "connect" button located in the pinhole on the receiver. While holding the connect button, press both the ∧ and ∨ button on the remote until the light on the remote turns on.

Operating Notes

The RT-14 can toggled between momentary and non-momentary functionality. In order to do this you must hold the COM button down for 10s.

Non-Momentary: Press the ∧ button to raise/extend your unit. Unit will keep moving until it reaches upper limit or you can press any button to stop it's movement cycle. Press the ∨ button to lower/retract your unit. Unit will keep moving until it reaches lower limit or you can press any button to stop it's movement cycle.

Momentary: Press and hold the ∧ button to raise/extend your unit, release the button to stop it's movement cycle. Press and hold the ∨ button to lower/retract your unit, release the button to stop it's movement cycle.
